SELECT A METAL FINISH

Choose from brilliant polished or distinguished antique finishes in gold, silver, copper, or brass; other unique finishes like black nickel are available as well.

EDGES - STANDARD OR DIAMOND-CUT?

All coins come standard with a flat rolling edge, but these can be customized too. Many coin designs benefit from a custom diamond-cut pattern around the border.

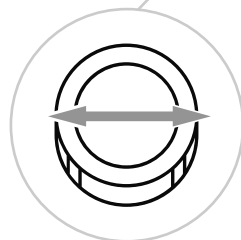

CHOOSE THE RIGHT FONTS

Fonts play a big role in the readability of your coin. Make sure to choose something legible, or if you're having trouble finding the perfect font, our award-winning designers are happy to help.

OPTIONS FOR DAYS...

Coins don't have to be just round, flat, or boring. Make your coin any shape with custom cut-outs and colors, or make it really stand out with our 3D Design option. You can even have them individually numbered, engraved, or made to accommodate a key ring. The possibilities are endless.

MEASURING COIN SIZE

Size guides are approximate. Always double check the widest points of your design.
